### 1.0 SUMMARY

This is the nineteenth monthly progress report. Six significant events occurred this month.

**Interim Report — River Addendum (Task 7).** The Phase II Pawtuxet River Proposal ("River Addendum") providing additional details about the proposal for future physical and release characterizations of the Pawtuxet River was submitted on 1/23/92.

**Project Management (Task 9).** Pre-mobilization activities for Phase II (e.g., preparing bid packages, scheduling contractors) began. As mentioned in the December Monthly Report, RIDEM requested additional information for the Freshwater Wetlands Permit application to install in-river wells and piezometers; on 1/7/92, Woodward-Clyde personnel visited the site to collect the information needed to complete the application, including engineering data needed to refine the access platform design.

**Data Management (Task 10).** Testing of the project data base software (modified in order to accommodate three analytical laboratories) continued.

**Water Level Monitoring.** Monthly groundwater level monitoring continued; water levels also were measured during the site visit (made to obtain additional information for RIDEM).

**Data Validation.** Validation of Round 3 groundwater samples continued.

**Quality Assurance Documents: Supplement.** Development of the Quality Assurance Documents: Supplement for the project continued.

\*As agreed, the reporting period will be monthly through the fourth Friday of the month.

SEMS DocID 666713

## **2.0 TASKS AND ACTIVITIES COMPLETED**

The sampling and other activities (subtasks) that were completed are reported here.

### **2.1 Sampling Activities Completed**

No sampling activities were conducted during this reporting period.

### **2.2 Other Activities Completed**

The other activities (subtasks) completed during this reporting period were described in Section 1.0.

## **3.0 JEOPARDY TASKS (scheduled tasks not completed)**

No tasks were in jeopardy as of 24 January 1992.

## **4.0 OTHER TASKS UNDERWAY (and on schedule)**

The tasks that were underway (and on schedule as of 24 January 1992) were described in Section 1.0.

## **5.0 DATA OBTAINED**

Groundwater level data have been obtained but have not yet been peer reviewed. Round 3 groundwater analytical data will be reported after they have been validated and loaded into the project data base.

## **6.0 PROBLEM AREAS**

The resolved, new, potential (i.e., anticipated or possible), and outstanding (i.e., still unresolved) problem areas are reported here.

### **6.1 Resolved Problem Areas**

No problem areas remained to be resolved during this reporting period.

### **6.2 New Problem Areas**

No new problem areas were identified during this reporting period.

### **6.3 Potential Problem Areas**

No potential problem areas were identified during this reporting period.

### **6.4 Outstanding Problem Areas**

No problem areas remained unresolved during this reporting period.

## 7.0 SCHEDULE OF TASKS (next two months)

The projected schedule is provided here. It covers the tasks to be performed in the next two months (February and March 1992), along with other comments or considerations.

Target Date	Task#	Task	Comments/Considerations
1/31/92	7	Quality Assurance Documents: Supplement	
ongoing	9	Project Management	
ongoing	10	Data Management	
ongoing	11	Project Administration	
ongoing	12	Quality Assurance	
ongoing	13	Health & Safety Assurance	

## 8.0 CHANGES IN WORK PLAN

No changes were made to the Work Plan during this reporting period.

## 9.0 OTHER COMMENTS

The plans going forward into February and March include:

- validation and reduction of the Round 3 groundwater analytical data,
- development and submission of the Quality Assurance Documents: Supplement, and
- additional planning for future investigations.
